

Loewe set out to reinvent itself, the Home Entertainment market and also plans to go beyond. We are actively working on human centered solutions for the Smart Home Market. All with the ultimate goal to create, not a connected, but a better home for our customers.

At the earliest opportunity, we are offering an internship in our Interaction Design team in the heart of Munich.

Internship Interaction Design

You will...

- Work in a small, interdisciplinary and highly motivated team with fun colleagues
- Be located in the heart of Munich, but also will actively work with our colleagues at Loewe's headquarter in Kronach
- Actively contribute to highly relevant questions and topics, e.g: "How are we going to watch TV in the future or an audio multi-room project."
- Participate or even actively navigate through design process: Starting with user research, continuing with user flows, wireframes, user tests, visual design, experience prototypes all the way to implementation support.
- Improve your skills on state of the art creative, process and collaboration tools, like the Adobe Suite, Principal, JIRA and Confluence

You are...

- An IxD student or similar and already studying in the 4th semester or higher.
- An open minded and self motivated person
- A strong believer that design can change things for the better
- A teamplayer with passion for consumer electronics
- Not afraid of getting your hands dirty while thinking structured and strategically
- Available asap for ideally 6 months

If this sounds interesting to you and you want to join, please send us your CV, portfolio and a few lines about yourself to **career@loewe.de**.

LOEWE.
